To whom it may concern,

Please let this letter serve as notice that our No519 unit, FCC ID number APIMLNO519, contains separate antennas for WiFi and Bluetooth. Further, the antennas are separated by a distance of 44.910 cm, over 2x the required distance of 20 cm. This implementation along with your review supports our position that collocation radiated emissions testing is not required for the No519.

For reference I have provided an illustration that shows the dimension between the WiFi antenna and the Bluetooth antenna.

Sincerely

A handwritten signature in cursive script that reads "Tim Song".
