

SHARP

SHARP CORPORATION,

22-22 Nagaike-cho, Abeno-ku, Osaka 545-8522, Japan

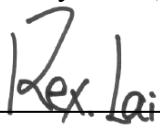

Date: October 19, 2010

To whom it may concern:

As showed in the internal photo, we put a copper foil on the shielding can, the purpose is to cover the hole on shielding can which is used by gluing jig to glue the baseband IC. It's a standard production process for this product, not a patch for FCC test samples.

Any questions regarding this declaration, please don't hesitate to contact us.

Sincerely Yours,

Rex Lai
