

Attachment to FCC Form 731

FCC ID: AQZ-VSR-4201-001

Exhibit 6

- **RX Test Report [Paragraph 2.1033(b)6]**
- **FCC Form 731 Submittal Matrix**

The full contents of Exhibit 6 are contained in 3 files as follows:

1. File 1: this header sheet, including a submittal matrix for the Form 731 attachments (exhibits) vs. the FCC Part 2 requirements, for the SCAT VHF Receiver, Harris model number VSR-4201-001.
2. File 2: a pdf file of the technical report from the test house, Instrument Specialties.
3. File 3: the test measurement photo page, from the test report.

The SCAT VHF Receiver, model number VSR-4201-001, referenced in this application for certification, has exactly the same hardware as the LAAS VHF Receiver, model number VLR-4201-001, reported on in this test report. The installed software differs slightly between the two units, solely due to the slight demodulation differences between the two, and the somewhat narrower frequency range of the VSR-4201-001 Receiver. The test data is applicable to both model numbers.

SUBMITTAL MATRIX

Part 2 Requirement (Paragraph)	Description	Filing Submittal
2.1033(b)1	Name/mailing address	Form 731
2.1033(b)2	FCC Identifier	Form 731
2.1033(b)3	Operating Instructions	Exhibit 8
2.1033(b)4	Description	Exhibit 12
2.1033(b)5	Block Diagrams	Exhibit 4
2.1033(b)6	Test Report	Exhibit 6
2.1033(b)7	Photographs	Exhibits 3 (external) and 9 (internal)
2.1033(b)8	Peripheral/accessory devices	Exhibit 8
2.1033(b)9	Transition provisions of 15.37	Not applicable
2.1033(b)10	DSSS transmitters; F-H transmitters	Not applicable
2.1033(b)11	Scanning receivers	Not applicable
2.1033(b)12	Transmitters in 59.0-64.0 GHz band	Not applicable
	ID Label	Exhibit 1
	Attestation Statement	Exhibit 2
	Test Setup Photos	Exhibit 7
