Harris seeks application approval for a Class 2 Permissive Change on the Unity Multiband portable radio.

This change adds P25 Phase 2 emission designators (8K10DWX) to the 700 MHz, 800 MHz, UHF, and VHF bands. Conducted power remains the same as well as PCB artwork and the radio enclosure; no new antennas have been added, so no SAR evaluation is warranted (previous measured bandwidths are the same or larger than this addition).

Rhein Tech Laboratories, Inc. agent authorization letter to act on Harris' behalf for this filing, has been provided.

Thank you for your kind consideration and timely review of this new addition to the Harris product family.

Sincerely,

Daryl Popowitch
Regulatory Manager
