

Sept. 10, 1999

Federal Communications Commission  
Authorization & Evaluation Division  
7435 Oakland Mills Road  
Columbia, Maryland 21046

Attention:       Equipment Authorization Branch  
Subject:         Type Acceptance for FCC ID: AXATR-399-A2

Members of the Commission,

Ericsson Inc. requests a grant for Type Acceptance for the above mentioned FCC Identifier. This portable transceiver is designed for use in the AMPS/DAMPS cellular telephone system. The portable operates in the 800 MHz Domestic Public Cellular Radiotelephone Communications Services per Subpart H of Part 22 and operates in the 1900 MHz Domestic Public Cellular Radiotelephone Communications Services, as per Part 24. When operating in the 1900 MHz range, DAMPS technology will be employed. It meets the requirements of IS-137A for operation in cellular systems. Documents governing DAMPS was used as a guide.

This radio has a push to talk feature that is described in on page 12 of the users manual in Exhibit 8.

This portable transceiver is quite similar to previously type accepted FCC ID: AXATR-375-A2.

Measurements and calculations for SAR have been made on this radio. This unit complies with IEEE C95.1-1991 (ANSI/IEEE C95.1-1992).

Ericsson Inc. requests confidentiality under 47 CFR 0.459 for the following exhibit listed:

Exhibit 4 Block Diagrams  
Exhibit 5 Circuit Diagrams  
Exhibit 12 Operational Description

Justification of this request is that in order to facilitate the circuit miniaturization of the AXATR-399-A2, certain proprietary techniques were implemented to reduce the board space required for the RF circuitry layout. The Operational Description exhibit provides unique information regarding Service/Alignment Codes. To protect Ericsson's competitive advantage on these proprietary techniques and alignment codes, we request the above listed exhibits be held as confidential and withheld from the Public Information File.

Sincerely,

Bryan McWatters  
Staff Engineer, Regulatory Programs
