Re: FCC ID B66ACR-RLB30
Applicant: ACR Electronics Inc.
Correspondence Reference Number: 15248
731 Confirmation Number: EA95888

Dear Mr. Coperich:

The "Product Manual" that was submitted with the ACR application for equipment authorization to the FCC is the old manual that is used for support of the product sold in Europe. A revised product manual is currently being submitted through Add Attachments that is applicable to the RLB-30 application. This manual will be used in all marketing after approval of the FCC is received for the RLB-30. This revised product manual for the RLB-30 makes no mention of satellite detectability.

Very truly yours,

ACR ELECTRONICS, INC.

.
