Create a password to secure your Hawthorne

1. On the Home screen, press MENU on the keyboard, touch **Settings**, touch **Security**, and then **Create password**.

2. In the **Create password** dialog box, type a password, re-enter the password, and then type a password hint. Touch **OK**.

> **NOTE:** Once a lock password is active, a password unlock window will appear each time your Hawthorne screen turns on.

> To unlock Hawthorne, press the **BACK** button and then enter your unlock password.

Disable password feature

1. On the Home screen, press MENU on the keyboard, touch **Settings**, touch **Security**, and then touch **Require password** to uncheck.

> **NOTE:** You can change the unlock password at any time by touching **Change password** and entering new password information.

2. In the **Confirm Password** box, type the password, and then touch **OK**.

Using a Bluetooth device with Hawthorne

Turn on Bluetooth

1. On the keyboard, press Menu, and then touch **Settings**.

2. Touch **Wireless controls**, and then touch **Bluetooth**. Wait until Bluetooth is enabled, indicated by the green checkmark.

Pair a stereo headset with your Hawthorne

1. Power up and turn on the stereo Bluetooth headset.

2. On the keyboard, press Menu, and then touch **Settings**.

3. Touch **Wireless controls**, and then touch **Bluetooth settings**.

4. Touch **Scan for devices**.

5. Touch your stereo headset from the list of choices.

6. If prompted, type in the PIN to pair the device, then touch the **OK** button. Once connected, **Connected to media audio** will be displayed under the name of the Bluetooth device. If **Paired but not connected** is displayed, touch the headset name again to connect it.

> **NOTE:** Refer to the guide that was included with your Bluetooth stereo headset for information regarding the device PIN.
