

(On official company paper)
Request for Limited-Modular Transmitter Module Approval

Module Characteristics declaration:

Item No.	Yes /No	Requirements	Declaration of the final design
1	No	Have its own RF shielding	
2	Yes	Have buffered modulation/data inputs (if such inputs are provided)	Refer to chipset specification
3	Yes	Have it own power supply regulation	Used AT 5231-3 3 KD in the U2 of the position, please refer to the schematic
4	Yes	Meet the antenna requirements of Section 15 203	Refer to Antenna specification
5	Yes	Be tested in a stand-alone configuration, i e , the antenna, AC or DC power and data input/output lines must be connected to the module but, the module must not be inside another case during testing	Refer to the photo of the IUT in the test report
6	Yes	Be labeled with its own FCC ID number, and if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module	Refer to Label Drawing document
7	Yes	The limited modular transmitter must comply with all specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization	Refer to the datasheet.
8	Yes	Address compliance with the Commission's RF exposure limits in Sections 1 1310 and 2 1093. In addition, spread spectrum transmitters operating under Section 15 247 are required to address RF exposure compliance in accordance with Section 15 247(b)(4)	Refer to the test report
