RE: Fujitsu Ten Limited

FCC ID: BAB271000-280

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Is a photograph of the PCB layout Photo-2 (RF-unit solder-side) available without the metal "bar" across the board?
- 2) It appears that only part of the RF schematics may have been provided. Please explain and/or provide as necessary.
- 3) Please explain the difference between the 221.7 MHz bandwidth measured and the CW bandwidth shown in the report. It appears that the emissions were not adjusted by 10 log (EWB/RBW). Please correct or explain why this was not necessary.
- 4) Figure 5.3 appears to be measuring between the incorrect points.
- 5) Please add labels to Plots 5.5 similar to last report.
- 6) For 9.654 GHz, 18-26 GHz, and 40-76 GHz measurements show in Table 5.1 & 5.2, please explain compliance to 15.35 for limiting peak emissions.
- 7) Test equipment does not appear to show any measurement antennas for 60 – 75 GHz.

Timothy R. Johnson
Examining Engineer
