Safety and handling

Apple Pencil may present a choking hazard or cause other injury to small children. Keep Apple Pencil away from small children.

Handle Apple Pencil with care. Apple Pencil contains sensitive electronic components, including a battery, and can be damaged or cause injury if dropped, burned, bent, crushed, or if it comes in contact with liquid. Don't use a damaged Apple Pencil.

Battery

Don't attempt to replace the Apple Pencil battery yourself—you may damage the battery, which could cause overheating and injury.

Lightning cable and connector

Avoid prolonged skin contact with the connector when the Lightning to USB Cable is plugged into a power source because it may cause discomfort or injury. For example, while Apple Pencil is charging using the Apple Pencil Adapter, the Lightning to USB cable, and a power adapter plugged into a power source, don't sit or sleep on them or place them under a blanket, pillow, or your body. Take special care if you have a physical condition that affects your ability to detect heat against the body.

Medical device interference

Apple Pencil contains components and radios that emit electromagnetic fields. These electromagnetic fields may interfere with pacemakers, defibrillators, or other medical devices. Maintain a

safe distance of separation between your medical device and Apple Pencil. Consult your physician and medical device manufacturer for information specific to your medical device. Stop using Apple Pencil if you suspect it is interfering with your pacemaker, defibrillator, or any other medical device.

Cleaning

To clean the outside of Apple Pencil, use a lint-free cloth. Don't get moisture in any openings or use aerosol sprays, solvents, or abrasives.
