The figure displays two side-by-side Spectrum Analyzer screenshots. Both screenshots show a signal with a peak at 5.24 GHz and a noise floor at -15.090 dBm. The left screenshot shows a signal with a peak at 5.24 GHz and a noise floor at -15.090 dBm. The right screenshot shows a signal with a peak at 5.24 GHz and a noise floor at -15.560 dBm. Both screenshots show a 1000 pts span and a 100 MHz frequency range.

CORE 2

The figure displays two side-by-side spectrum analyzer screenshots. Both show a signal with a peak at 41.230 MHz and a noise floor at -21.55 dBm. The left screenshot shows a signal with a peak at 41.230 MHz and a noise floor at -21.55 dBm. The right screenshot shows the same signal with a peak at 41.210 MHz and a noise floor at -20.47 dBm. Both screenshots show a signal with a peak at 41.230 MHz and a noise floor at -21.55 dBm. The signal is a square wave with a peak at 41.230 MHz and a noise floor at -21.55 dBm. The signal is a square wave with a peak at 41.230 MHz and a noise floor at -21.55 dBm.
