

FCC ID: BMWTFY7292C

Frequency Range: 2405-2480MHz

Low threshold = $60/f(\text{GHz}) \text{ mW} = 60 / 2.480 = 24.19\text{mW}$

Conducted Output Power Measured (dBm) = 5.1dBm

Antenna Gain (dBi) = -8dBi

EIRP = 0.51mW

Conducted Output Power (mW) = 3.24mW

Since both Conducted output power and EIRP are below the low threshold, device complies with FCC's RF radiation exposure limits for general population/uncontrolled exposure category as a portable device without SAR evaluation.
