Dear Mike,

Re-Q#1:
Attached please find the revise test report.

Re-Q#2:
The EUT is a lower power device with about 5mW only output power and less than 1 dBi antenna gain. I think the description of "20 cm separation distance requirement" is not needed add in the user manual.

Re-Q#3:
Attached please find the revise confidentiality letter.

Any other questions please feel free to contact with me.
Thank you.

Best regards,
Joe
