**Subject: Class II Permissive Change for FCC ID: C3K00002101**

This is to request a Class II Permissive Change for limited modular approval FCC ID: C3K00002101, originally Granted on 3/26/2025.

The changes requested in this application are:

- 1) Addition of coexistence filter to the 5/6GHz path
- 2) Updated power tables - the maximum power is reduced for some 5GHz and 6GHz 802.11 operating modes and RU configurations, otherwise it remains the same as in the original filing.

Output power measurements, radiated spurious emissions data and band edge data is being submitted with this application. RF exposure assessment has not been repeated as the EIRP values remain the same, or lower, than in the original filing and therefore remain representative.

Note: DTS and DSS operations are not affected by this change and hence are not part of this C2PC scope.

Sincerely,

*Chaitrali Limaye*
