**Subject: Change of ID update Letter for FCC ID's: [C3K1901 and C3K1956]**

Dear OET,

We are requesting that the applications for change in IDs for FCC ID C3K1901 and C3K1956 be placed into audit mode to allow the application cover letters for the change in ID to be replaced and, where applicable, the grant conditions updated. At the time of the original filing the change in ID request should have included reference to a C2PC for the originating device, which had been granted prior to the change in ID request. We mistakenly omitted reference to this C2PC in their Change in ID request letter.

FCC ID's C3K1901 and C3K1956 also have subsequent permissive change grants associated with them. These C2PCs are not impacted by this request but the grant conditions for the C2PC for C3K1901 require updating. We will coordinate through the TCB to provide the relevant filing information.

Sincerely,

A handwritten signature in black ink, appearing to read "Nisha", with a horizontal line underneath it.
