Mr. Andy Leimer
Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

Dear Mr. Leimer:

We have received the Park Air Systems Ltd. letter dated November 7, 2006, regarding request for Federal Communications Commission (FCC) certification of the 6525MDR; very high frequency (VHF) COM transceiver, with FCC ID - No. C8LB6525MDR, which operates in the VHF band. Having completed the subject review for this ground transceiver we have no objection to the FCC granting certification for the VHF 6525MDR, produced for ACARS and Mode 2 operations, providing 8.33 kHz channel spacing will not be exercised within the United States National Airspace System.

If you require any additional information, please contact Ms. Annette Allender, Spectrum Planning and International Office, at (202) 267-3893.

Sincerely,

Robert A. Frazier
Manager, Spectrum Planning and
International Office
