

5811 FCC COVER LETTER

To Whom It May Concern,

This letter is to inform you of our request for a Class 2 Permissive Change to our transmitter known as: CFS8DL5811. The reason for this change is that the vendor for our Crystal YL1 (10.78125 MHz) has informed us that it has gone obsolete. We wish to replace this Crystal with a Pin-For-Pin exact replacement from a new vendor. The new Crystal serves the same function (Transmitter FDE), has the same frequency (10.78125 MHz), and is a Pin-For-Pin exact replacement. However, the loading capacitor (C5) must change from 5.0 pF to 1.0 pF. but it is our understanding that this is allowed under FCC Policy doc: KDB178919.

Regards,

Greg Barbato
(for Kenneth Eskildsen)
