

EXHIBIT 1-1

CFS8DL5816AP

Functional Description.

The 5816AP is a battery powered portable transmitter and is part of a wireless alarm system. It is used in conjunction with a receiver (5882) as a remote sensor to indicate a window or door opening event to the alarm system. The CFS8DL5816AP is identical in operation to the CFS8DL5816 with the exception that it transmits on: 315Mhz +/-82Khz rather than 345 Mhz. Modulation is still on-off keyed AM modulation. And the 5816AP sends a regular supervision or check-in message, no more often than once per hour. It also sends messages initiated by the condition of the loop (open or closed).
