DATE: 10/10/2007	TESTED BY: G. Barbato
PCB/ASSY REVISION: LYNX with GSM	PRODUCT: LYNXREN-6

TEST NAME : RADIATED EMISSIONS

The LYNX-GSM contains a receiver (unintentional radiator). A check for radiated emissions is done to verify the level of radiation is insignificant. With the receiver ON, emissions is checked at the Local Oscillator frequency and its harmonics. (Local Oscillator Leakage) this is the report that was supplied to the FCC.

Test Data -Radiated Emissions
