Attn: FCC Office of Engineering and Technology / UL Verification Services TCB

Subject: PROWIFI

Dear Sir/Madam,

The PROWIFI is a derivative of the previously certified Wi-Fi / Z-Wave module (FCC ID: CFS8DLWFZW). The only difference is that the Z-Wave radio block was removed with no changes to the Wi-Fi section. Only radiated testing (spurious and Bandedge) along with output power measurement are performed on the PROWIFI as other data will be leveraged from the CFS8DLWFZW report. Radiated testing to confirm continued compliance and output power so as to compare with the power of CFS8DLWFZW."

Thank you,

Sincerely.
