

DESCRIPTION OF DEVICE

CFR47, SECTION 2.1033(4) For Part 15 a brief description of the circuit functions of the device.

RSP-100, SECTION 8.1 ... a brief description of the radio equipment.

The RF6 Temperature Sensor is a battery powered 2.4 GHz IEEE 802.15.4-compliant transceiver, and is part of a wireless alarm system. It has the capability to sense the temperature at its installation location and send the reading back to the control panel upon request or at a regular interval.
