Dennis,

Please see the response below.

- 1) Please give summary list and description of antenna options contained in this filing.
Answer: The antennas for this filling are as follows: Hitachi Antenna, Ethertronics Antenna, Toshiba Dual Film Antenna, and Toshiba Wide Dual Film Antenna. Please refer to "Antenna" attachments for the descriptions.
- 2) Grant note has no-co-loc statement, exhibit "Antenna Location" seems to show diversity and co-loc antennas - please explain. **Answer:** The Grant note is correct. The photograph I provided with the original submittal was incorrect. Please refer to "Photograph - Antenna Location" attachment.
- 3) Filing contains two EMC reports - 142 pages and 187 pages. Why two separate reports, what are differences? **Answer:** There is only suppose to be one EMC test report. The 142 page report is the correct one.
- 4) Please submit separate exhibit(s) for Test Setup Photos containing only photos, not complete EMC report. Please include close-up photos of typical stand-alone setup for radiated tests. **Answer:** Please refer to "Photographs - Test Setup" attachment.
- 5) DA 00-1407 has eight numbered criteria, cover letter here only lists seven - please revise. **Answer:** Please refer to "Request for Modular Approval" attachment.

If there is anything else that you need, please let me know.

Regards,
Rick Candelas
