McLean, VA 22101

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for FCC certification of an intentional unlicensed transmitter. On behalf of our client, Compatible Electronics, Inc. has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

The submittal is for approval of the Intel Mini PCI Type 802.11BG Wireless LAN Adapter. This particular EUT already has modular approval under the FCC-ID: PD9WM3B2200BG. The grant required a separation distance of at least 20 cm from all persons.

We are requesting a Class II Permissive Change to add the Hewlett Packard platform HSTNN-Q09C under the FCC-ID: CNTWM3B2200BG. This platform has the SAR testing performed on it.

The Series HSTNN-Q09C also has the Bluetooth Module inside of that is approved under the FCC-ID: LNQBTM200. The test report enclosed is used for all current HP platforms.

If you have any questions or need any additional information, please give me a call at (714) 579-0500.

Sincerely,

Kyle Fujimoto  
Test Engineer
