

Radiated Emissions Test Setup Photos

Horizontal Orientation

Parallel Vertical

The image consists of two photographs of a custom-built wooden turntable. The top photograph shows the turntable from a front-three-quarter perspective. It features a thick, rectangular wooden top platter with the number '210' marked on its corners. Below this is a circular wooden base. A small, rectangular label is placed on the base, containing the following text: 'LAWSON F. S. 2500 WATT', '2500 WATT', '3720', and 'RE'. The bottom photograph shows the turntable from a side perspective, revealing the internal components. A small, rectangular motor is mounted on the base, connected to a power source. The turntable is supported by four wooden legs. The background is a plain, light-colored wall.
