

## Technical Description

This device is an AirLink Wireless Ethernet Bridge, which operates in the 2.4GHz frequency spectrum with throughput of up to 108Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 108Mbps, the 11Mbps data rate with DSSS technique will be applied.

The transmitter of the EUT is powered by AC adapter. The antenna used in this product is Dipole antenna without connector.

The other instruction, please have a look at the users manual.
