

**Report No. : FA040901** 

# **RF Exposure Evaluation Report**

APPLICANT : Logitech, Inc.

**EQUIPMENT**: Wireless Headset

**BRAND NAME: Logitech** 

MODEL NAME: A-00025

FCC ID : DZLA00025

FILING TYPE : Certification

STANDARD : OET Bulletin 65 Supplement C (Edition 01-01)

We, SPORTON INTERNATIONAL INC., would like to declare that the tested sample has been evaluated in accordance with FCC OET Bulletin 65 Supplement C (Edition 01-01).

The test results in this report apply exclusively to the tested model / sample. Without written approval of SPORTON INTERNATIONAL INC., the test report shall not be reproduced except in full.

1. Introduction

The report has been prepared on behalf of Logitech, Inc. Wireless Headset to show compliance with the

RF Exposure.

Requirements

Three different categories of transmitters are defined by the FCC in OET Bulletin 65. These categories

are fixed installation, mobile and portable and are defined as follows:

Fixed installation:

Fixed location means that the device, including its antenna, is physically secured at a permanent

location and is not able to be easily moved to another location. Additionally, distance to humans form

the antenna is maintained to at least 2 meters.

Mobile Devices:

A mobile device is defined as a transmitting device designed to be used in other than fixed locations

and to be generally used in such a way that a separation distance of at least 20 centimeters is normally

maintained between the transmitter's radiating structures and the body of the user or nearby persons.

Transmitters designed to be used by consumers or workers that can be easily re-located, such as a

wireless modem operating in a laptop computer, are considered mobile devices if they meet the 20

centimeter separation requirement. The FCC rules for evaluating mobile devices for RF compliance are

found in 47 CFR 2.1091.

Portable Devices:

A portable device is defined as a transmitting device designed to be used so that the radiating

structure(s) of the device is/are within 20 centimeters of the body of the user. Portable device

requirements are found in Section 2.1093 of the FCC's Rules (47 CFR 2.1093)

For this test report the Logitech A-00025 is being done as a mobile device and the MPE is evaluated at

the 20cm test distance.

Report No. : FA040901

The FCC also categorizes the use of the device as based upon the user's awareness and ability to

Report No. : FA040901

exercise control over his or her exposure. The two categories defined are Occupational/Controlled

Exposure and General Population/Uncontrolled Exposure. These two categories are defined as

follows:

Occupational/controlled Exposure:

In general, occupational/controlled exposure limits are applicable to situation in which persons are

exposed as a consequence of their employment, who have been made fully aware of the potential for

exposure. Awareness of the potential for RF exposure in a workplace or similar environment can be

provided through specific training as part of a RF safety program. If appropriate, warning signs and

labels can also be used to establish such awareness by providing prominent information on the risk of

potential exposure and instructions on methods to minimize such exposure risks.

General Population/Uncontrolled Exposure:

The general population / uncontrolled exposure limits are applicable to situations in which the general

public may be exposed or in which persons who are exposed as a consequence of their employment

may not be made fully aware of the potential for exposure or cannot exercise control over their

exposure. Members of the general public would come under this category when exposure is not

employment-related; for example, in the case of a wireless transmitter that exposes persons in its

vicinity. Warning labels placed on low-power consumer devices such as cellular telephones are not

considered sufficient to allow the device to be considered under the occupational/controlled category,

and the general population/uncontrolled exposure limits apply to these devices.

Since there are no warnings or training associated with this unit and it can be used by anyone, Wireless

Headset is evaluated to the General Population / Uncontrolled Exposure limits.

## 2. Administration Data

#### 2.1 Testing Laboratory

Test Site	SPORTON INTERNATIONAL INC.	
Test Site I eastion	No. 52, Hwa Ya 1 <sup>st</sup> Rd., Hwa Ya Technology Park, Kwei-Shan Hsiang, Tao Yuan Hsien, Taiwan, R.O.C.	
Test Site Location	TEL: +886-3-327-3456 FAX: +886-3-328-4978	

## 2.2 Applicant

Company Name	Logitech, Inc.
Address	4700 NW Camas Meadows Drive Camas, WA 98607

#### 2.3 Manufacturer

Company Name	Merry Electronics (Shenzhen) CO., LTD.	
Address	No. 50, MeiBao Road, Dalang Street, BaoAn District, Shenzhen City,	
	GuangDong Province, China	

SPORTON INTERNATIONAL INC.

TEL: 886-3-327-3456 FAX: 886-3-328-4978 FCC ID: DZLA00025 Page Number : 6 of 8
Report Issued Date : Jun. 15, 2010

Report No. : FA040901

Report Version : Rev. 01

## 3. General Information

#### 3.1 <u>Description of Device Under Test (DUT)</u>

Product Feature & Specification		
DUT Type	Wireless Headset	
Brand Name	Logitech	
Model Name	A-00025	
FCC ID	DZLA00025	
Tx Frequency	2400 MHz ~ 2483.5 MHz	
Rx Frequency	2400 MHz ~ 2483.5 MHz	
Antenna Type	PCB Antenna	
HW Version	R3	
SW Version	2.0.2	
	Bluetooth (1Mbps) : GFSK	
Type of Modulation	Bluetooth EDR (2Mbps) : $\pi$ /4-DQPSK	
	Bluetooth EDR (3Mbps) : 8-DPSK	
DUT Stage	Production Unit	

#### **List of Accessory:**

Specification of Accessory		
	Brand Name	SYNERGY
Battery	Power Rating	3.7Vdc, 265mAh
	Туре	Li-ion
USB Dongle	Brand Name	Logitech, Inc.
USB Dollgle	Model Name	A-00026
USB Cable 1	Signal Line Type	0.03 meter shielded cable without ferrite core
USB Cable 2	Signal Line Type	2.1 meter shielded cable without ferrite core

**Remark:** The above DUT's information was declared by manufacturer. Please refer to the specifications or user's manual for more detailed description.

Report Issued Date : Jun. 15, 2010
Report Version : Rev. 01

Report No.: FA040901

## 4. RF Exposure Evaluation

## 4.1 Radio Frequency Radiation Exposure Evaluation

For this device, the calculation is as follows:

> No evaluation required if power is below this power threshold:

Frequency	Power	Power
(GHz)	(mW)	(dBm)
2.48	24.19	13.84

Maximum measured transmitter power for the EUT:

Power
(dBm)
4.14

Threshold for no RF exposure evaluation is 13.84 dBm.

Transmitter power of this device is 4.14 dBm.

**Conclusion:** No RF exposure evaluation required since transmitter output power is below the power threshold.
