McLean, VA 22101

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a Class II Permissive Change approval of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This is a Class II Permissive Change approval of the Intel WiFi Link 5300 (MN: 533AN_HMW, FCC ID: E2K533ANH), which is a WiFi adapter (802.11a, 802.11b, 802.11g, and 802.11n). It was tested installed in the Mini PCI-E slot of various Dell host platforms with a set of Acon, Amphenol, Smart, & Tyco Antennas continuously transmitting from Chain A, B, and C antenna ports. (Please refer to test report for specific combinations tested)

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Candelas".
