

Program Overview

FASD has been contracted by SWATCH TELECOM to design a 900 MHz FLEX numeric pager that meets specific requirements. These product requirements are detailed in the Development and Supply Contract dated 3-February 1998.

The style and appearance were defined by for us and are depicted below. The size of the product is roughly 60mm x 40mm x 15mm. The unique design elements are the overall appearance of the housing, the style of the product and the control mechanism.

Products, Options, and Accessories Summary

PRODUCTS :

There is only one model planned. In order to be consistent with the Motorola model nomenclature and still allow the customer a simple means of ordering the three different colors, each color will have an associated option number.

A05STS5801_A SWATCH Numeric Pager, 900 MHz

The APC Code for this project is 97A.

PRODUCT OPTIONS :

Color Selection:

The three colors are Orange (Multi), Blue, and Graphite. The default color will be black and the other options will be as follows:
