

OVERVIEW - PARENT UNIT

OVERVIEW - BABY UNIT

SOUND SENSITIVITY AND SOUND ACTIVATION

Adjust sound detection sensitivity

You can choose to hear the tone, or to hear sounds that exceed a certain level.

What you can hear...

- When sound sensitivity is on, the parent unit screen stays off to save power.
- When sound sensitivity is on, the parent unit screen stays off to save power.
- When sound sensitivity is on, the parent unit screen stays off to save power.

Sound activated screen

When sound activation is on, the parent unit screen stays off to save power.

What you can hear...

- When sound sensitivity is on, the parent unit screen stays off to save power.
- When sound sensitivity is on, the parent unit screen stays off to save power.
- When sound sensitivity is on, the parent unit screen stays off to save power.

MOUNT THE BABY UNIT (OPTIONAL)

Mount the baby unit on the wall

1. The type of screws and anchors you need depend on the composition of the wall.

2. Insert the screws into the holes and tighten the screws until only 2-4 mm of the screws are exposed.

3. Place the baby unit on the wall mount bracket. Tighten the screws into the bracket. Then, use the screws to secure the baby unit to the wall. Adjust the baby unit so that it is level and the wall mount is tight. Tighten the screws until it locks into place.

4. Add the ends of the baby unit cords to your preferred angle.
