Subject: Models PG9904 and PG9904P
Certification Number: IC: 160A-PG9904P

To Whom It May Concern:

The DSC Models PG9904 and PG9904P Wireless Motion Detectors are built using the same PCB assembly, RF circuitry, plastic enclosure and PIR sensor and have similar functionality.

The only difference between the two models is the Pet Immune type of lens used for the model PG9904P. This type of lens is ensuring a greater immunity to pet movements in the protection-covered area in order to reduce false alarms.

Respectfully yours,
