Modular Approval Request

FCC ID: GDI-523442001

The following attestation addresses the requirements to support modular approval:

Modular approval requirement	Yes (provide brief statement)	No *
(a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly	Yes, metal enclosure	
(b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal	Yes, The NXP CLRC663 has 512 byte FIFO buffer	
(c) The module must contain power supply regulation on the module	Yes, 3.3V and 4.5V regulator on module	
(d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	Yes, permanently attached	
(e) The module must demonstrate compliance in a stand-alone configuration	Yes, has been tested	
(f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements)	Yes, FCC marking is printed on module	
(g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements	Yes, user manual has required warnings	
(h) The module must comply with RF exposure requirements	Yes, low power, SAR evaluation exempt	

* Please provide a detailed explanation if the answer is "No."

Yours sincerely,
