

The Cover Sheet to reply the Comment on the Equipment Application

Project Info:

Application Type: Class II Permissive Change

QUANTA COMPUTER INC. - FCC ID: HFS-BCM94313HMG

REFERENCE: JOB 3120TC9

1. SGS SAR TEST REPORT: Section 2. Summary of Results. 802.11b, 802.11g, and 802.11n; Conducted Output Power (average???) is listed at 15.73 dBm and does not agree with either of the above..

Comments on Question: In order to reach the power consistency between SAR test and Regulatory Compliance test, we've measured the average power and documented in the report of regulatory compliance. We've added the summarized table and measuring plots on the page 19 to 23 of report, Test_Report_ER-2009-A0007_15.247&RSS210. Please have it verified.
