SUBJECT: Class II Permissive Change for FCC ID: HFSG021A

The intension of this application is to enable the modular FCC ID: HFSG021A, granted on 07/24/2019 to be integrated in **Computing Device**, Model: **G021A**. Power reduction as given in the max conducted output power table in order to comply with SAR requirement.

The module installed into host platform mentioned above is electronically and mechanically identical to the original certified module. The Original FCC testing on module under FCC ID: HFSG021A was performed with an antenna of higher gain, and the antenna was connected to the module in an open environment. The current host platform under application uses an antenna of the same type but of lower gain and is installed inside the host platform enclosure. The physical restraints introduced by the host platform should have resulted in equal or lower level of radiated emission. Therefore, additional Radiated emission testing is not necessary. Software security remains unchanged from the original application.

Sincerely yours,

Joyce Kuo
