**FCC ID: HN2ABTM3-3**

**NORTHWEST EMC, INC.**

22975 NW Evergreen Parkway, Suite 400  
Hillsboro, OR 97124

March 13, 2003

Dear Application Examiner:

On behalf of Intermec Corporation, Northwest EMC Inc is submitting this application for the certification of Intermec's ABTM3 radio, FCC ID: HN2ABTM3-3. It is a 1mW Bluetooth radio that will only be used in the applicant's 700C hand held terminal as a portable transmitter.

The EUT can be configured with only one internal antenna. The EUT will be co-located with two other radios: FCC ID:HN22011B-2 (802.11(b) radio), and FCC ID:HN2SB555-2 (CDMA radio). Any two of the three radios can transmit simultaneously. All three radios cannot transmit simultaneously. Each radio transmits through its own antenna. The Northwest EMC technical report and associated spurious emissions data are supplied in support of the simultaneous transmission of the co-located radios. The RF exposure exhibit (SAR Reports) also addresses the exposure conditions of the co-located radios.

Intermec Corporation was previously granted certification for this same radio in the 700C (FCC ID: HN2ABTM3-2) for mobile use only. This application is for a change in exposure condition to portable use.

The technical reports and exhibits demonstrate compliance with FCC rules 47 CFR 15.247

To facilitate the review process, an index of exhibits has been provided.

Your efforts in reviewing this application are greatly appreciated.

Best regards,

A handwritten signature in blue ink, appearing to read "G. Kiemel", with a stylized flourish at the end.

Greg Kiemel, Director of Engineering  
Northwest EMC, Inc.
