

## OPERATIONAL DESCRIPTION

The device is a 72 MHz, hand-held transmitter for R/C of model aircraft, typically having 20 cm separation (held with two hands in front of the body).

The equipment employs a vertical polarized antenna directly mounted on the unit and meets Paragraphs 95.645, 95.647, 95.649, and the technical requirements established in the Report & Order in PR Docket 90-222.
