Subject: Clarification on Response to Inquiry to FCC

The inquiry that prompted the referenced Response to Inquiry to FCC was initially submitted for a different Garmin application than the one before you now, and therefore contains the FCC ID (2AN5Z-001R1) of a module that is not part of this application.

However, this guidance also applies to the application before you now, and is being submitted in support of it. The FCC ID of the module in this application is IPH-03302, as illustrated in the Requested Grant Note in the test report and in the ID label exhibit.

Please advise if there are any questions.

Thank you.

Kathy Grzovic
