Date: August 27, 2013

SUBJECT: FCC Application for IPH-A3AMGD

To Whom It May Concern:

Regarding FCC ID label placement for this application, Garmin wishes to place the label inside the battery compartment because of limited areas. This device is small, handheld with many curved surfaces. The front is taken up by the large portion of the display and the back is mostly taken up by the removable battery compartment cover. This location will offer and ensure the end user opportunity to view the label before operation. The identifier label will be readily viewable each time the battery is removed or replaced. The equipment is sold without the battery installed offering the end user exposure to the label before operation. This location will help ensure the longevity of the label as this equipment may be in service in harsh environments.

Sincerely,

A handwritten signature in blue ink, appearing to read "Van Ruggles".

Van Ruggles
Director, Quality Assurance and Certification
