RE: Statement of Similarity between Garmin models VHF200 and VHF100

The Garmin Models: VHF100/VHF100i and VHF200/VHF200i are similar products that share the same housings and common electronic assemblies.

The standard VHF100 & VHF200 are programmed for use in the North American market (and markets that follow North American conventions)

The VHF100i & VHF200i are programmed for use into the EU and other markets that have similar frequency allocations and specific feature sets.

The VHF200 has the most complex configuration, and contains several additional features that are not populated in the VHF100 hardware. These features include:

- NMEA2000 communications bus support
- Hailing feature
- External speaker support
- Extra "Phonebook" entries
- Extra display language support

Sincerely,

A handwritten signature in black ink that reads "David Heald". The signature is written in a cursive style with a large initial "D".
