

Annex B2

Radiated Spurious Emissions Simultaneous Transmission

LMR + 5 GHz WIFI

Notes for Annex B plots

For the simultaneous transmission spurious emission plots, 3 plots are provided for each measurement.

1 plot shows the LMR transmitter on and the Part 15 transmitter off (trace 1).

LMR spurious signals are marked for later comparison to the plot with both transmitters on.

A second plot shows the Part 15 transmitter on and the LMR transmitter off (trace 2). All Part 15 transmitter spurious signals are marked and meet the limits for the Part 15 transmitter.

A third plot shows the LMR transmitter and the Part 15 transmitter on.

In all cases, the spurious emissions meet the spurious emission limits for the transmitter creating the spurious emission.

In no simultaneous transmission measurements did the 2 transmitters produce any spurious emissions to be over the limits for the rule part being tested.
