Class II Permissive Change  
731 Confirmation No.: EA100859  
Correspondence Reference No.: 19382**

Dear Joe:

Further to our amendment response submitted on May 28, 2001 is additional clarification regarding your e-mail questions dated May 22, 2001.

1. The users manual for this filing is a separate manual to the original filing and is exclusive to the new IX550 PC model listed in this Class II Permissive Change filing.
2. The separation distance required for RF exposure compliance is the same for this Class II Permissive Change filing and the original filing (4.0cm).
3. The three additional vehicle mount antennas tested (Maxrad Z565, Z569, Z571) are intended for use only with the new IX550 model PC listed in this filing and are not intended for operation with the IX250 PC model listed in the original filing.

If you have any further questions or comments, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Shawn McMillen". The signature is written in a cursive style and is positioned to the left of a vertical line that separates it from the typed name below.

Shawn McMillen
