Subject: Processing Gain Data on the AirPro Gold IP Product

Joyce

Documents are in reference to the FCC testing for P-Com WO # 77060.

Attached you will find the requested data for the AirPro Gold Processing Gain. You will also find a memo describing the FCC requirement for calculations. In this memo you will find a summary of the results and a diagram of the test set-up. It is our understanding that there are no other requirements for the completion of the FCC testing/certificate. Please inform me if you still require any additional information.

Please address me on any future communications, since Dave Smart is out of the office for the next few weeks.

Summary of Results:

Modulation Type	Data Rate	% passed	% out of spec.	FCC limit for out of spec.	Pass/Fail
BPSK	1Mb/s	100%	0%	20%	Pass
QPSK	2Mb/s	100%	0%	20%	Pass
8CCK	5.5Mb/s	99%	1%	20%	Pass
64CCK	11Mb/s	97.7%	2.3%	20%	Pass

See next page for test set-up.

Thank You
