The image shows an Agilent E4404A 190-280 GHz Power Sensor Analyzer. The device is a large, light-colored rectangular unit with a control panel on the right and a display on the left. The display shows a graph of power vs. frequency with a peak at 88.49 kHz. The control panel has numerous buttons for frequency, power, and system settings, along with a numeric keypad. A probe is connected to the front panel, and a small handheld device is visible on the right side of the image.
