

Annex no. 11

Periodic Operation Characteristics

A manually operated transmitter shall employ a switch that will automatically deactivate the transmitter within not more than 5 seconds of being released.

Release point

For all buttons the same!

Worst case transmission time during a 100ms period

Date: 10.JUN.2011 13:56:03

Date: 10.JUN.2011 13:55:40

The duration of one worst case single pulse is 31.5 ms

Maximum transmitting duration in every 100ms period: 31.5 ms

Averaging factor = $20 \times \log(31.5/100) = \mathbf{-10,0 \text{ dB}}$
