**Overall Assessment Letter for RIM Blackberry Model RCG41GW  
FCC id: L6ARCG40GW**

I have reviewed this application and find it compliant. This is an application for a handheld Blackberry which supports GSM/GPRS/EDGE 850/1900, 802.11a/b/g and Bluetooth.

Since it also has an USB port for connection to Computers a filing for a Class B Computer peripheral has also been made.

Please note the following:

1: Spread Spectrum Declarations

The various declarations to meet the Spread Spectrum requirements are included in the Operating Description exhibit.

2: SAR

The product supports simultaneous transmission. Simultaneous transmission SAR was not required to be tested and approved and the test report was reviewed in accordance with KDB 447498 D01 Mobile Portable RF Exposure v03.

Yours sincerely

Vina Kerai  
Compliance Engineer
