RE : Application for obtaining a transmitter approval
Attached Application Form 731
FCC ID: LLB09010B

Dear Sir or Madam:

Aclara RF Systems Formerly Hexagram Inc. wishes to obtain approval for a telemetry transceiver with the FCC ID LLB09010B.

The LLB09010B transceiver is used to transmit data from a utility meter to a data collection unit.

The LLB09010B Transceiver device is the 2-way communication device, which includes a Transmitter and a Receiver.

Complete information about LLB09010B device is documented in the attached application documentation including schematics and photographs. The LLB09010B transmitter was tested for conformance to the technical requirements of 90.201 Subpart I-General Technical Standards. Results of tests are attached to this application.

The LLB09010B was found to comply with all technical requirements of 90.201.

Sincerely,

Mark Wilbur
