This letter is to declare that Cubic Transportation Systems is reusing LTE/WIFI/BLE/BT test data from the following listed FCC and ISED modular-approved test reports as part of our FCC and ISED application. The Validator 3.0 modules used, and their RF parameters are the same as reported in the original reports and there are no modifications to these RF parameters in Cubic Transportation Systems production process.

The test reports have been reviewed and remain valid and representative of performance within this product. Appropriate validation testing has been performed and Nemko USA, Inc. test reports are provided within the filing. Two RSS standards (RSS-130 Issue 2, and RSS-139 Issue 4) have been up-issued, though the requirements contained within the up-issued standards are all met.
