

NOVATEL WIRELESS

Request for Modular Approval – FCC ID: **MIVGSM0308**

Item	Requirements	EUT Compliance
1	The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	Meets requirements.
2	The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with Part 15 requirements under conditions of excessive data rates or over-modulation.	Meets requirements.
3	The module has its own power supply regulation.	Meets requirements.
4	The modular transmitter must comply with the antenna and transmission system requirements of Sections 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of Section 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section.	Meets requirements.
5	The module must demonstrate compliance in a stand-alone configuration	Meets requirements.
6	The module must be labeled with its permanently affixed FCC ID label, or use an electronic display	Meets requirements.
7	The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements	Meets requirements.
8	The module must comply with RF exposure requirements. If SAR compliance can only be demonstrated in specific host types or platforms, then the module type must be "limited."	Meets requirements.

Sincerely,

Todd Gallagher
