

## **RF Exposure Statement**

### **1. Standard Applicable**

According to 1.1307 (b)(1), systems operating under the provisions of this section shall be operated in a manner that ensure that the public is not exposed to radio frequency energy level in excess of the Commission's guideline.

This is a portable device.

### **2. Measurement Result:**

This a portable device and the max peak output power is 4.21 dBm = (.0026 W). The Max. Antenna Gain is 4.1 dBi. Therefore, the EIRP = 8.31 dBm (6.77mW), which lower than the threshold of 60/f GHz mW = (24.19 mW)

The SAR/MPE measurement is not necessary.

The device have include WLAN and Bluetooth function but WLAN antenna separation Bluetooth antenna more than 5cm. Refer to KDB 648474 there are no SAR collation requirement.
