Subject: Original Application for Class B Computing Peripheral
FCC ID: NHZ-9605-33-34 / SCSI Disc Array Module, Model SCSI BackPlane

Gentlemen:

Enclosed, please find Amaquest Computer Corporation's application for equipment authorization dated November 22, 1999. The subject device is in compliance with Part 15, Subpart B of the FCC Rules.

The subject device is a SCSI Disc Array Module with hot-swap hard disc drives that may be configured as either a standalone or RAID controller redundant storage sub system. This module system uses controller type 8751 that operates at 11 MHz with transmission speeds up to 80 megabytes per second. Also, this module system will be marketed in two different model configurations to house either five or seven hot-swap hard disk drives.

This EUT was system tested with both model configurations in accordance with ANSI C63.4-1992 to show compliance to CISPR 22 Class B limits.

Should you have any questions or comments, please contact the undersigned. Thank you for your attention and cooperation in this matter.

Sincerely yours,

Richard Mullen
