Re: FCC ID: NNK6TX
Correspondence reference number: 13861

Using a CISPR quasi-peak adapter I obtained a meter reading of 11.8 dBuV at the point of the maximum emission at 608.0 MHz. Adding the antenna correction factor of 20.28 to this yields 32.08 dBuV at 3 Meters. Which is less than the limit for the restricted band for this frequency.
